NOTE

Items are complete textual translations of the original except when designated excerpt(s) or summary, when the overall heading "News Briefs" is used, or when editorial compression or compilation is obvious, as in the case of biographic lists and editorial reports.

The contents of this publication in no way represent the policies, views, or attitudes of the U.S. Government.

PROCUREMENT OF PUBLICATIONS

JPRS publications may be ordered from the National Technical Information Service, Springfield, Virginia 22151. In ordering, it is recommended that the JPRS number, title, date and author, if applicable, of publication be cited.

Current JPRS publications are announced in Government Reports Announcements issued semi-monthly by the National Technical Information Service, and are listed in the Monthly Catalog of U.S. Government Publications issued by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Correspondence pertaining to matters other than procurement may be addressed to Joint Publications Research Service, 1000 North Glebe Road, Arlington, Virginia 22201.

SOVIET BIBLIOGRAPHY ON PARAPSYCHOLOGY (PSYCHOENERGETICS) AND RELATED SUBJECTS

Moscow

1971

CONTENTS

FROM THE COMPILERS

Parapsychology (psychoenergetics) is a field involving psychical and biophysical study of informational and energetic possibilities of living organisms.

Parapsychology investigates the complex of phenomena relating to the interaction of living organisms with each other and with the surrounding environment without the mediation of sense organs known to us.

In the foreign literature on parapsychology, this complex of phenomena is designated by the term psi phenomena and also by ESP (extrasensory perception).

Considering the interest of Soviet scientists in experimental and theoretical research abroad in the field of parapsychology and considering that our country does not have a complete bibliographical listing of the most recent foreign literature on this problem, the authors of this work (having at their disposal a large volume of information and contacts with more than 35 countries of the world where parapsychology is being studied) compiled the present bibliography on the given problem.

The listing includes the more important monographs, surveys, and articles on experimental and theoretical studies published in the last 70 years both in special parapsychological journals and in publications from other sources. Inasmuch as parapsychology is a complex problem standing on the boundary of many fields of learning, the compilers have included the more interesting literature on several related problems. The appendix of this listing contains an enumeration of the most important parapsychology journals published in different countries of the world and a foreign bibliography of Soviet investigations in the given field.

The compilers express their deep gratitude to all foreign colleagues, institutes, laboratories, and firms whose courtesy has enabled them to complete this work by telling them of their studies and by maintaining friendly scientific contacts with Soviet investigators.

We would like you to send your wishes, comments, additions, and questions to the following address:

PART THREE

PRINCIPAL LANDMARKS IN THE DEVELOPMENT OF SOVIET PARAPSYCHOLOGY

1. 1922. Creation of a special commission under the Brain Institute, headed by Academician V. M. Bekhterev, to study the problem of mental suggestion.

2. 1924. Eleventh Congress of Psychoneurologists. Reports were delivered for the first time on experimental investigations of mental suggestion.

3. 1926. Creation of a special commission, under the Society for Neurology, Reflexology, Hypnology, and Biological Physics, headed by Academician V. M. Bekhterev.

4. 1932-1937. Fundamental experimental studies were conducted on mental suggestion under the leadership of Prof L. L. Vasil'yev.

5. 1959. Publication of Prof. L. L. Vasil'yev's book Tainstvennyye Yavleniya Chelovecheskoy Psikhiki [Mysterious Phenomena of the Human Psyche], Gospolitizdat.

6. 1960. Organization of a Laboratory for Aeroionization and Electromagnetic Fields under Leningrad State University.

7. 1962. Issue of B. B. Kazhinskiy's book Biologicheskaya Radiosvyaz' [Biological Radio Communication]. Published by the UkSSR Academy of Sciences, Kiev.

8. 1962. Issue of Prof. L. L. Vasil'yev's book Eksperimental'nyye Issledovaniya Myslennogo Vnusheniya [Experimental Studies of Mental Suggestion]. Published by Leningrad University.

9. [Missing from text.]

FOREIGN BIBLIOGRAPHY
ON PARAPSYCHOLOGY (PSYCHOENERGETICS)
AND RELATED SUBJECTS

Moscow

1971

CONTENTS

FROM THE COMPILERS

Parapsychology (psychoenergetics) is a field involving psychical and biophysical study of informational and energetic possibilities of living organisms.

Parapsychology investigates the complex of phenomena relating to the interaction of living organisms with each other and with the surrounding environment without the mediation of sense organs known to us.

In the foreign literature on parapsychology, this complex of phenomena is designated by the term psi phenomena and also by ESP (extrasensory perception).

Considering the interest of Soviet scientists in experimental and theoretical research abroad in the field of parapsychology and considering that our country does not have a complete bibliographical listing of the most recent foreign literature on this problem, the authors of this work (having at their disposal a large volume of information and contacts with more than 35 countries of the world where parapsychology is being studied) compiled the present bibliography on the given problem.

The listing includes the more important monographs, surveys, and articles on experimental and theoretical studies published in the last 70 years both in special parapsychological journals and in publications from other sources. Inasmuch as parapsychology is a complex problem standing on the boundary of many fields of learning, the compilers have included the more interesting literature on several related problems. The appendix of this listing contains an enumeration of the most important parapsychology journals published in different countries of the world and a foreign bibliography of Soviet investigations in the given field.

The compilers express their deep gratitude to all foreign colleagues, institutes, laboratories, and firms whose courtesy has enabled them to complete this work by telling them of their studies and by maintaining friendly scientific contacts with Soviet investigators.

APPENDIX I. List of Journals on Parapsychology

U.S.A.

1. Proceedings of the American Society for Psychical Research. (1907 - quarterly)

2. Journal of the American Society for Psychical Research.

3. Newsletter of the American Society for Psychical Research.

4. Journal of Parapsychology. (1937 - quarterly), Durham, N. C.

5. Bulletin FRNM, Durham, N. C. (1964)

6. International Journal of Parapsychology. 1959 - 1968 quarterly.

7. Newsletter of the Parapsychology Foundation. Quarterly.

8. Psychics, 1969 -- quarterly. San Francisco, California.

GREAT BRITAIN

1. Proceedings of the Society for Psychical Research

2. Journal of the Society for Psychical Research. 1884 - quarterly

3. Newsletter of the Society for Psychical Research

4. Journal of Paraphysics

GERMANY

Zeitschrift fur Parapsychologie und Grenzgebiete der Psychologie (Journal of Parapsychology and Related Fields of Psychology), Freiburg im Bresgau (In German)

AUSTRIA

Grenzgebiete der Wissenschaft (Dowsing and Related Fields)

HOLLAND

Tijdschrift voor Parapsychologie (Journal of Parapsychology), 1928.

FRANCE

Revue Metapsychique (Metaphysical Review)

JAPAN

Proceedings of the Japanese Society for Parapsychology

ITALY

1. Rassegna Italiana di Ricerca Psichica - Organo officiale della society Italiana di parapsychologie (Italian Review of Psychic Research, The official organ of the Italian Parapsychological Society), Rome

2. Metapsichica. Rivista Italiana di Parapsicologia. (Metaphysics, Italian Review of Parapsychology), Genoa
